The No Leak Warranty

Our biggest promise that the skylights you add to your home will not leak.

VELUX's three patented layers of water protection work seamlessly to ensure no rain will leak into your home through your skylight.

The No Leak Skylight™

• No Leak Promise • No Worries

The Glass in Our Skylight

Clean, Quiet & Safe Glass

The name says it all: it's cleaner, quieter, and safer than any skylight glass on the market today.

Clean, Quiet & Safe Glass is made with silicon dioxide, making it much smoother than ordinary glass so water disperses evenly to evaporate quickly and reduce water spotting. It reduces up to 25% more of unwanted outside noise than standard double pane glass and up to 50% more than plastic skylights. And since Clean, Quiet & Safe Glass is a laminated glass, it's safe and compliant with all building codes for out-of-reach applications.

Standard on all
FS/VS/VSS/VSE/VCS/VCE/EV/EF/EVMS models. (xx04)

Impact Glass
Our toughest glass, resistant to penetration from wind-borne debris.
(xx06)

White Laminated Glass
White coating diffuses 100% of light flowing to the space below.
(xx08)

Snowload Glass
Reinforced glass to withstand added weight from accumulated snow.
(xx10)

Tempered Glass
Built with an additional degree of hardness for added safety.
FCM / VCM / QPF only
(xx05)

What is a Roof Pitch?

RUN
12"

RISE
X"

Pitch = X:12

The roof pitch is defined as the angle of the roof, and it's calculated by the number of inches it rises vertically for every 12" it extends horizontally. This angle is measured by placing a pitch-gauge directly on the roof and taking an accurate reading.

This calculation is important because each of VELUX's skylights and flashing kits are engineered with specific pitch requirements that match a roof's slope in order to effectively drain water off of the skylight.

SKYLIGHT FLASHING

Deck-Mounted Combi-Flashing™

EKL
low-profile roofing material
shingles/shakes

EKW
high-profile roofing material
tile/corrugated metal

14° - 85°
3:12 - 137:12   EKL/EKW Roof Pitch

- Combi-Flashing™ allows for large installations of multiple skylights.

- Must specify vertical gutter spacing when ordering. May be from 2.5" to 12" in 1/2" increments Combi-Flashings™ with gutters 4.5" or wider have additional charges.

- Only the 2.5", 3", 3.5" and 4" gutters are stocked; all other widths are special order and carry a 15-day production time.

- EKW 4" gutter side by side configuration only, 1x combinations 4" gutter only.

- Gutter sizes listed are frame to frame - RO to RO will be $^1/_2$" larger, ex. 3" listed gutter = 3.5" RO to RO.

Bringing light to life

Non-dealer disclaimer
List prices shown do not include shipping and handling cost, delivery cost by your local VELUX Dealer or applicable sales tax. Final unit pricing can be 10–15%+ higher depending on your location, services provided and final delivery of the skylight to the job site. Many of the skylights do not include flashings or blinds. These can be purchased separately.

All VELUX skylights, roof windows, Sun Tunnel® Skylights, flashing kits and blinds must be purchased through a qualified VELUX dealer. Please see the "Where To Buy" section of veluxusa.com website for a list of VELUX dealers near you.

NOTICE: ALL GLASS MAY BE SUBJECT TO UNEXPECTED AND SPONTANEOUS BREAKAGE in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX.

VELUX offers the choice of laminated or tempered glass skylights. Impact glass and comfort plus glass are all types of laminated glass. Comfort glass is a type of tempered glass. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB) or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces. When tempered glass breaks, pieces of glass come loose and may strike an individual.

CONSULT LOCAL REGULATIONS AND/OR BUILDING MATERIAL CONSULTANTS TO DETERMINE WHICH TYPE OF GLASS IS RIGHT FOR YOU OR IF LAMINATED GLASS IS REQUIRED IN YOUR APPLICATION.
