ENGINEERED TO IMPRESS

With more than 18 years of successful performance, it's easy to see why LP® SmartSide® is one of the fastest-growing brands of siding materials in the U.S.

A Pioneer Of Change

LP SmartSide is redefining traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. It's a building industry leader in a category that is shaping the way homes, outdoor building structures and light commercial properties are being built.

See the innovation that goes into making LP SmartSide products at [youtube.com/lpsmartside](https://www.youtube.com/lpsmartside).

STRENGTH IS AT THE CORE

LP® SmartSide® products are built with bold innovations that make them stronger and longer-lasting than traditional wood trim and siding. It's a material that boasts clear durability advantages when compared to vinyl and fiber cement cladding.

A Natural Defense Against Nature

SmartGuard® helps LP SmartSide products withstand extreme temperatures, heavy humidity, arctic freeze thaws and everything in between. It's a process that treats our products to the core with four components of protection that add strength and resist fungal decay and termites.

LP® SmartSide®

5/50
YEAR

LIMITED
WARRANTY

A Warranty That Builds Trust

LP has your back with an industry-leading warranty that offers exceptional peace of mind for you and your customers.

* For complete warranty details visit LPSmartSide.com

Four Components of Protection

Give It Your Best Shot

LP SmartSide products withstand impact from airborne debris and everyday bumps better than vinyl and fiber cement siding. That means fewer callbacks for repairs and happier homeowners. See how LP SmartSide is made at youtube.com/lpsmartside.

Vinyl

STAND OUT WITH YOUR OWN CUSTOM LOOK

Picture Perfect

LP® SmartSide® products offer homeowners the bold look of their signature cedar-grain texture in profiles that are always in style. It's been the siding of choice for more than 18 years for homeowners who want uncompromising quality and distinctive curb appeal.

Choose your style. Choose your colors. Get the look you want. That's the beauty of working with treated engineered wood trim and siding. LP SmartSide products offer you the versatility to achieve stunning results with ease. Whether you're building a traditional craftsman or a modern masterpiece, LP SmartSide is a beautiful choice.

**WORKS
THE WAY
WOOD IS
SUPPOSED
TO**

LP® SmartSide® treated engineered wood siding cuts out the time you spend dealing with warped and split pieces. Virtually every piece is straight and ready to use. Plus, you'll get lengths up to 16' for fewer seams and less waste to haul off the site.

Makes Building Easier

LP SmartSide trim and siding cuts with standard woodworking tools, unlike fiber cement cladding that requires expensive diamond blades.

LP SmartSide products are lightweight, resist breakage during handling and make installation incredibly easy. Plus all LP SmartSide products come pre-primed and ready to paint to help you save time.

LP Has Workability Nailed

- Works and cuts like traditional wood
- Lightweight, easy to carry, less breakage
- Longer lengths, fewer seams, less waste

Watch our Building Science videos to see how LP SmartSide makes treated engineered wood products last longer at [youtube.com/lpsmartside](https://www.youtube.com/lpsmartside).

GROW WITH US

A Smart Choice For Our Planet

LP® SmartSide® is a must-have material to help builders qualify for green building programs. Plus, many homeowners and building owners are demanding sustainable products that have minimal impact on our environment.

We're not just building for the future, we're helping to protect it by actively investing in reforestation and preserving wildlife habitats.

Naturally Sustainable

The LP SmartSide manufacturing process begins with wood, a renewable resource, grown and gathered under strict Sustainable Forestry Initiative® standards. We source fast-growing trees and use 99% of the log for either the product or the fuel to make it. Plus, all binding agents and resins are low-emitting and safe for children and pets.

Responsibly Made With Wood

- Responsibly made with a renewable resource – wood
- 99% of the log is used
- No added formaldehyde
- Qualifies for green building programs

Learn more about LP's environmental programs at [LPCorp.com](https://www.lpcorp.com).

**THE
BEAUTIFUL
DIFFERENCE
BETWEEN**

**FIBER AND
STRAND
PRODUCTS**

LP® SmartSide® products are available in two similar types of treated engineered wood substrates to achieve distinctly different looks.

Both treated engineered strand and treated engineered fiber substrates incorporate our proprietary SmartGuard® process to enhance strength and offer protection against termites and fungal decay. However, strand substrates are better suited to create deep wood-grain textures, and fiber substrates are ideal for smooth finishes.

Treated Engineered Strand Substrate

- Treated with the SmartGuard process
- Best substrate for deep cedar-grain texture
- Excellent resistance to warping, splitting and cupping
- Offers superior impact resistance
- LP's 5/50 year limited warranty*

Treated Engineered Fiber Substrate

- Treated with the SmartGuard process
- Best substrate for a smooth finish
- Excellent resistance to warping, splitting and cupping
- Superb design versatility
- LP's 5/50 year limited warranty*

*See LPsmartSide.com for complete warranty details.

GET THE TIMELESS LOOK OF WOOD LAP

Traditional, Bold, Subtle, Daring, Modern

Create the look you want with a versatile selection of LP SmartSide products. Easy to install and engineered to stand up to extreme weather, LP SmartSide lap siding is a natural, durable choice for buildings in any region. Plus, it's the perfect companion cladding for structures partially finished in stucco, stone and brick.

DURABILITY REDEFINED

Strength Has A New Look

Tough to the core, LP SmartSide Panel Siding is a treated engineered wood product that's more durable, stable and consistent than traditional wood panels. It's easy to recommend for light commercial, shed and residential applications that require a premium look and the toughness to combat extreme weather.

Cedar Texture Panel

Rated For Structural Use By
The Engineered Wood Association

- Shiplap edges with advanced bead system for easier alignment
- Pre-primed for exceptional paint adhesion
- Significantly lighter than comparable fiber cement panel
- Strong enough to be nailed directly to stud, making additional sheathing unnecessary in many applications
- Eliminates need for additional bracing on load-bearing walls
- Ideal exterior for homes in areas of high winds or seismic activity
- Treated engineered wood strand substrate

Also available in fiber substrate.

- Not rated for structural use
- Treated engineered wood fiber substrate

GET THE RIGHT LOOK FROM EVERY ANGLE

An Innovative Alternative To MDO, Plywood, Vinyl Or Metal Vents

When you use LP SmartSide Soffit on your projects, people will notice your attention to every detail. You'll get the same wood grain or smooth look that matches other LP SmartSide products in a soffit that's pre-cut to the width you need. Vented soffits are also available with precisely cut, bug-resistant vents that exceed most building code requirements.

Cedar Texture Soffit

The Finishing Touch

- The perfect alternative to MDO and plywood soffits
- Cut-to-width eliminates time spent ripping full sheets
- 38 Series engineered for closed soffit applications
- The 76 Series and 190 Series are ideal for use as the starter course for roofs with exposed eaves
- Treated engineered wood strand substrate

Also available in fiber substrate.

- Not rated for exposed eave applications
- Engineered for closed soffit applications
- Treated engineered wood substrate

Vented Soffit

Engineered To Cut Out Problems

- The perfect alternative to MDO, plywood or hand-installed metal vents
- Precisely cut vents offer 10 square inches of ventilation per linear foot, making it easier to meet code requirements while adding architectural beauty
- Designed to minimize paint build-up and promote continuous airflow
- Vents are as small as International Building Codes allow (1/8"), to keep hornets and bees out
- Eliminates time spent ripping full sheets
- Treated engineered wood strand substrate

START STRONG WITH LP BUILDING PRODUCTS

LP® SolidStart® Laminated Strand Lumber (LSL)

LP SolidStart LSL installs like traditional lumber but surpasses it in strength and consistency. It's strong, straight and ideal for a variety of applications. Long lengths and uniform dimensions reduce jobsite waste, and low moisture content reduces shrinkage.

LP® TopNotch® Sub-Flooring

LP TopNotch Sub-Flooring features a line of performance OSB sub-flooring available in three options to fit any building project.

LP® FlameBlock® Fire-Rated OSB Sheathing

LP FlameBlock Fire-Rated OSB Sheathing has structural design values equal to standard sheathing in the same performance category. ICC-certified (ESR-1365) per AC264 with a Class A and 30-minute Flame Spread Rating (ASTM E84), it combines fire resistance and impressive structural performance in a single panel.

LP® TechShield® Radiant Barrier Sheathing

The original, #1 brand of radiant barrier sheathing, LP TechShield Radiant Barrier Sheathing reduces monthly cooling costs by blocking up to 97% of the radiant heat in the panel from emitting into a home's attic, lowering attic temperatures by up to 30° F.
